

We need to see
your medical card.
Here's why:

An eye doctor is a necessary part of your healthcare team. An eye exam not only helps uncover vision correction needs; it also gives insight into your overall health.

An eye exam typically involves:

- Refractive Exam
- Dilation
- Prescription for Glasses or Contact Lenses

Your VSP® network doctor can help detect signs of more than 270 eye conditions* like:

- Diabetic Retinopathy
- Cataracts
- Macular Degeneration
- Glaucoma

We may ask you for your medical ID card to bill your medical insurance, in addition to your vision insurance.
